### **DETAILED ACTION**

### Specification

1. The abstract is objected to because of the use of legal phraseologies "means".

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes." etc.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "the values of stipulated parameters" recited in claim 1, line 16 lacks antecedent basis.

Application/Control Number: 10/624,652 Page 3

Art Unit: 2611

### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 6. Claims 1, 2, 8, and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyatani (US 2002/0041209).

Regarding claims 1, 2, 8, and 14, Miyatani, as shown in figures 1 and 10, teaches a distortion compensation apparatus comprising a signal level detection means (5, 12), distortion compensation execution means (62, 63, 69, 70), distortion compensation control value corresponding update means (67, 68), and distortion compensation control value corresponding updating mode parameter value control means (74). See also paragraphs [0051] – [0064]; [0067]; [0070]; [0102]; [0126] – [0145]; [0147]; [0148]; [0156] and [0238] – [0253].

## Allowable Subject Matter

7. Claims 3-7, 9-13, and 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/624,652 Page 4

Art Unit: 2611

### Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Stonick et al (5,900,778), Horaguchi et al(US 2002/0101938) and Yang et al (US 2003/0207680) are cited because they are pertinent to the distortion compensator in transmitter having amplifier.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on MON - FRI (9:00-6:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
